Challenges in Nursing Management of Emerging Therapies for Hematologic Malignancies

Product Disclosures

Reflecting standard oncology/hematology practice, which often requires uses and dosages for therapeutic products that have not been approved by the US Food and Drug Administration, this educational activity includes information about many drugs. All faculty participating in continuing education activities are expected to disclose the approved or investigational status (related to the subject matter of this activity—hematologic malignancies) of all products and devices under discussion. This information, as of the time of printing, is summarized briefly in the table below. In addition, primary references and full prescribing information should be consulted for complete information. Clinicians have the professional responsibility to ensure that drugs are prescribed and used appropriately, based on their own clinical judgment and accepted standards of care.
